DMP 2011 - State Planning Policy (SPP1/02)

(Development in the vicinity of certain airports and aviation facilities)

The State Planning Policy seeks to protect airports and aviation facilities. Archerfield airport is one of the airports of State significance identified in SPP 1/02. The policy seeks to ensure that planning strategies for land around airports protect airport efficiency and viability, avoid limitations to aircraft operations, protect development (and occupiers) from adverse effects of airport operations, and protect public safety.

The policy applies to land in the vicinity of the airport and in particular:

- the operational airspace;
- land in the vicinity of the aviation facilities;
- within the area defined by the 20 ANEF; and
- within Public Safety Areas (PSA's) defined at the ends of each main runway.

The Public Safety Areas as defined by State Planning Policy 1/02 have been added to the *Master plan vision* drawing and to the *Practical capacity ANEF* drawing, to assist BCC with its assessment of development applications on land near the ends of the main runway.

If you would like to be kept informed of airport related developments, please sign-up to our e-newsletter by clicking here: www.archerfieldairport.com.au
